

## HTML AND CSS COURSE

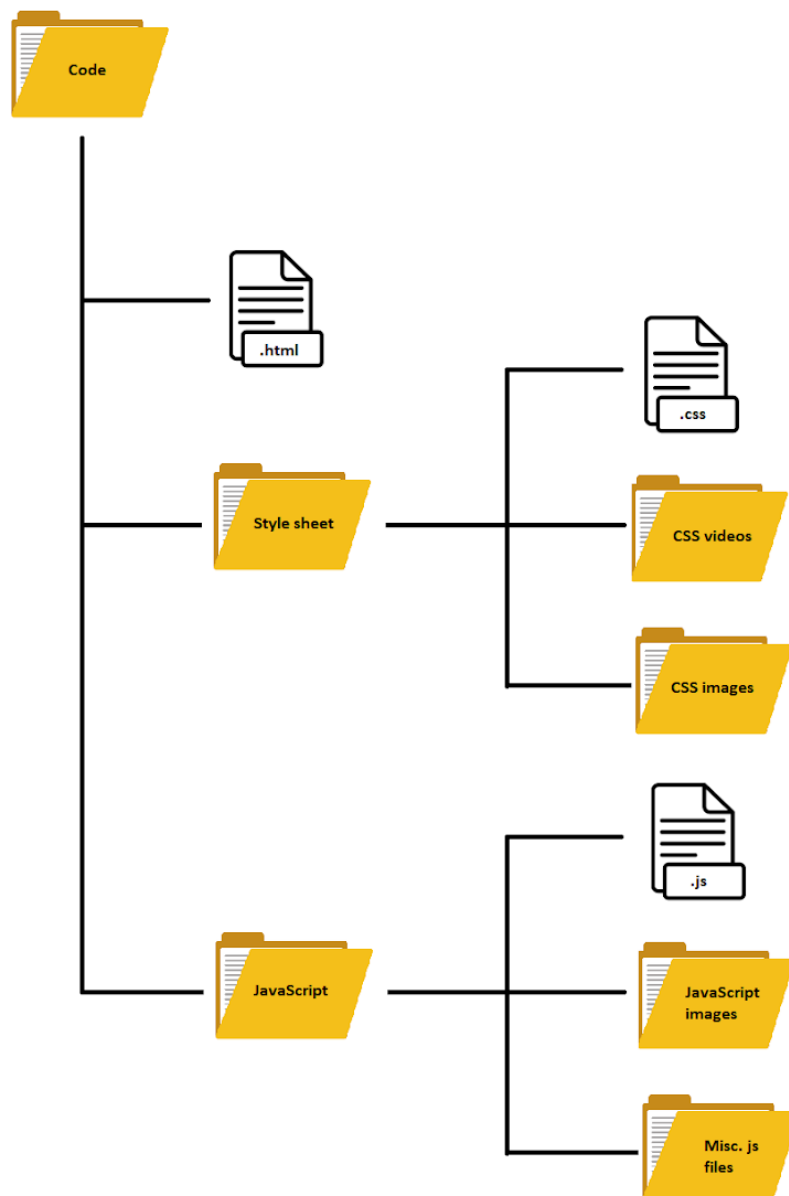

You are 5 days ahead on your boot camp. Well done and keep up the good work!

Course Progress: 15%

Bootcamp Progress: 15%

### FILE PATHS

Code should be organized by file and folder. Here is an example diagram of a web site's folder structure:

A file path describes the location of a file in a web site's folder structure. File paths are used when linking an HTML file to external files like:

1. **Style sheets** (files containing the CSS code that styles the website)

2. JavaScript files

3. Web pages

4. Images
